DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of restriction in the reply filed on 10/15/04 is acknowledged. The traversal is on the ground(s) that the Examiner incorrectly applied the restriction under the MPEP. This is not found persuasive because any object attached on the boom can influence airflow and thus create some aerodynamic lift and the method can be used to rearm land vehicles or sea vehicles. Plus, the claimed apparatus does not require the claimed method to operate differently.

The requirement is still deemed proper and is therefore made FINAL.

Claims 17-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected restriction, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on 10/15/04.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because it contains legal terms such as comprises. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Roberge.

Roberge discloses an apparatus having a boom 22, weapon mounts (see figure 6), and weapon platforms (see figures 8, 10, 11).

Allowable Subject Matter

Claims 2-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Piasecki, McDonnell, Weimer et al, Ruggeri, Nelson et al, Currier, and Fitch et al disclose aircraft carrying means.
